AT THE HIGH LEVEL INTERNATIONAL SCENE

2. Zero Hunger

8. Good Jobs and Economic Growth

13. Protect the Planet

15. Life on Land

17. Partnerships for the Goals
EBAFOSA ensures the growing middleclass in Africa, who are demanding more diverse and processed foods are leveraged as a market for growth of African food processing industries.
The middleclass has expanded to an estimated 300 million people.

Current imports that cost Africa as high as USD 35 billion annually.

1-1.4 Trillion

Estimated middle-class spending by 2020.
Sylvia Banda is blazing the trail of women entrepreneurship by leveraging value addition through primary and secondary processing, marketing and offering training to local farmers.
Almost two-thirds of Zambia's 14.5 million people live in rural areas, where most are engaged in smallholder subsistence farming.
Despite her restaurant being a great success, years later, however, Sylvia was frustrated at seeing how imported food is preferred by the majority, particularly in urban areas. “Imported food has less nutritional value and is more expensive than local food. This, combined with the poverty of smallholder farmers struggling to sell their crops locally, led me to shift my focus.” She now works to empower local farmers and promote local food for poverty alleviation.
SHIFT TO LOCAL PRODUCTION

She allows farmers to create grower schemes so that they can help each other with production challenges and ensures quality produce.
She established a “pay-forward” system for farmers to be able to afford the cost of transport to the market.
GROWING OUT

Sylvia is an excellent example to demonstrate the transformative impact of training farmers and sharing knowledge and business skills.
Creating a supply chain with even other Business resellers who are registered members
HOPE FOR THE FUTURE?

Towards a prosperous Africa
THANK YOU!
