Some Country Achievements
December 2016 - June 2017

EBAFOSA Côte d’Ivoire

EBAFOSA has established an inter-agency task force hosted by the Ministry of Agriculture, Environment and Forests, chaired by the Ministry of Agriculture and Food Safety, to implement a new EBA-based, clean energy powered agro-industrial strategy for the country. The task force has already been convened and has begun its work. A list of priority projects has been established to support the implementation of the strategy, including the establishment of EBA-based, clean energy powered agro-industrial zones. The task force is coordinating with other ministries, including the Ministry of the Sea, Inland Water and Fisheries, to ensure a coordinated approach to the implementation of the strategy. The task force is also working with stakeholders, including local communities, to ensure that the strategy is implemented in a way that benefits all stakeholders.

EBAFOSA D.R. Congo

EBAFOSA D.R. Congo has formed an inter-agency task force hosted by the Ministry of Science and Technology, Higher Education and Research, and the Ministry of Environment and Natural Resources. The task force is working to implement a new EBA-based, clean energy powered agro-industrial strategy for the country. The task force has already been convened and has begun its work. A list of priority projects has been established to support the implementation of the strategy, including the establishment of EBA-based, clean energy powered agro-industrial zones. The task force is coordinating with other ministries, including the Ministry of Agriculture and Food Safety, to ensure a coordinated approach to the implementation of the strategy. The task force is also working with stakeholders, including local communities, to ensure that the strategy is implemented in a way that benefits all stakeholders.

EBAFOSA Mozambique

EBAFOSA Mozambique has formed an inter-agency task force to implement a new EBA-based, clean energy powered agro-industrial strategy for the country. The task force is working to implement a new EBA-based, clean energy powered agro-industrial strategy for the country. The task force has already been convened and has begun its work. A list of priority projects has been established to support the implementation of the strategy, including the establishment of EBA-based, clean energy powered agro-industrial zones. The task force is coordinating with other ministries, including the Ministry of Science and Technology, Higher Education and Research, to ensure a coordinated approach to the implementation of the strategy. The task force is also working with stakeholders, including local communities, to ensure that the strategy is implemented in a way that benefits all stakeholders.

EBAFOSA Malawi

EBAFOSA Malawi has formed an inter-agency task force to implement a new EBA-based, clean energy powered agro-industrial strategy for the country. The task force has already been convened and has begun its work. A list of priority projects has been established to support the implementation of the strategy, including the establishment of EBA-based, clean energy powered agro-industrial zones. The task force is coordinating with other ministries, including the Ministry of Science and Technology, Higher Education and Research, to ensure a coordinated approach to the implementation of the strategy. The task force is also working with stakeholders, including local communities, to ensure that the strategy is implemented in a way that benefits all stakeholders.

EBAFOSA Ghana

EBAFOSA Ghana has established an inter-ministerial task force to implement a new EBA-based, clean energy powered agro-industrial strategy for the country. The task force has already been convened and has begun its work. A list of priority projects has been established to support the implementation of the strategy, including the establishment of EBA-based, clean energy powered agro-industrial zones. The task force is coordinating with other ministries, including the Ministry of Science and Technology, Higher Education and Research, to ensure a coordinated approach to the implementation of the strategy. The task force is also working with stakeholders, including local communities, to ensure that the strategy is implemented in a way that benefits all stakeholders.

EBAFOSA Togo

EBAFOSA Togo has identified anchor initiatives to mobilize support for the implementation of a new EBA-based, clean energy powered agro-industrial strategy for the country. The initiatives are focused on building capacity for research work, increasing coverage of site based EBA, and encouraging farmers to adopt EBA-based, clean energy powered technologies. The task force has already been convened and has begun its work. A list of priority projects has been established to support the implementation of the strategy, including the establishment of EBA-based, clean energy powered agro-industrial zones. The task force is coordinating with other ministries, including the Ministry of Science and Technology, Higher Education and Research, to ensure a coordinated approach to the implementation of the strategy. The task force is also working with stakeholders, including local communities, to ensure that the strategy is implemented in a way that benefits all stakeholders.

EBAFOSA Uganda

EBAFOSA Uganda has identified anchor initiatives to mobilize support for the implementation of a new EBA-based, clean energy powered agro-industrial strategy for the country. The initiatives are focused on building capacity for research work, increasing coverage of site based EBA, and encouraging farmers to adopt EBA-based, clean energy powered technologies. The task force has already been convened and has begun its work. A list of priority projects has been established to support the implementation of the strategy, including the establishment of EBA-based, clean energy powered agro-industrial zones. The task force is coordinating with other ministries, including the Ministry of Science and Technology, Higher Education and Research, to ensure a coordinated approach to the implementation of the strategy. The task force is also working with stakeholders, including local communities, to ensure that the strategy is implemented in a way that benefits all stakeholders.

EBAFOSA Zambia

EBAFOSA Zambia has identified anchor initiatives to mobilize support for the implementation of a new EBA-based, clean energy powered agro-industrial strategy for the country. The initiatives are focused on building capacity for research work, increasing coverage of site based EBA, and encouraging farmers to adopt EBA-based, clean energy powered technologies. The task force has already been convened and has begun its work. A list of priority projects has been established to support the implementation of the strategy, including the establishment of EBA-based, clean energy powered agro-industrial zones. The task force is coordinating with other ministries, including the Ministry of Science and Technology, Higher Education and Research, to ensure a coordinated approach to the implementation of the strategy. The task force is also working with stakeholders, including local communities, to ensure that the strategy is implemented in a way that benefits all stakeholders.
